

## **BC HYDRO POWER SAFETY**

### **SESSION ABSTRACT:**

A power outage due to natural events, like earthquakes, flooding, or severe weather, can take anywhere from a few hours to several days to be restored. Do you know what to do?

This session will look at personal preparation and planning for dealing safely with outages, downed power lines, and what to do if you're ever evacuated in an emergency. It will also look at BC Hydro's approach to the restoration of power, which is a key component to maintaining critical emergency services in any natural disaster.
